GUIDE BOOK

Customer Support

Answering customers, tickets, appointments and claims

THIS DESK IS RESPONSIBLE FOR

- A customer asking where their cargo is gets an accurate answer, not a guess
- Every promise made to a customer is recorded where the next person can see it
- Problems are raised as claims, not settled quietly over the telephone

support@aitransit.co.zm · Department

Contents

01 Your home screen

What customers are waiting on, and what has gone wrong that somebody needs to explain.

02 Answering "where is my cargo?"

The question you will be asked more than any other. One search box answers it.

03 Tickets

A question or a complaint that is not finished yet. Keep it open until it actually is.

04 Appointments

Cargo pickups in Makeni, and market or factory visits in Guangzhou.

05 Issues & claims

Cargo that is missing, short, damaged or under investigation.

06 Customers

Everyone on the books, with their cargo, their invoices and what they owe.

07 China markets

The sourcing directory customers ask about — which market sells what, in which city.

Before you start

Signing in

Everyone at AITRANSIT signs in at the same address with their own email and password. The system knows your department and opens your own screens — you never choose a role.

Your login **support@aitransit.co.zm**

ON EVERY SCREEN

The sidebar on the left is your department's menu — it only ever shows what your desk is allowed to open. The search box at the top accepts a tracking number, a customer, a phone number or a QR scan. Your name is at the bottom of the sidebar, with the language switch and the light/dark switch beside it.

GOOD TO KNOW

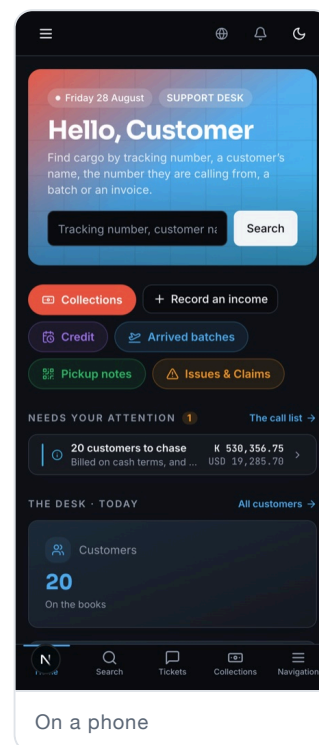

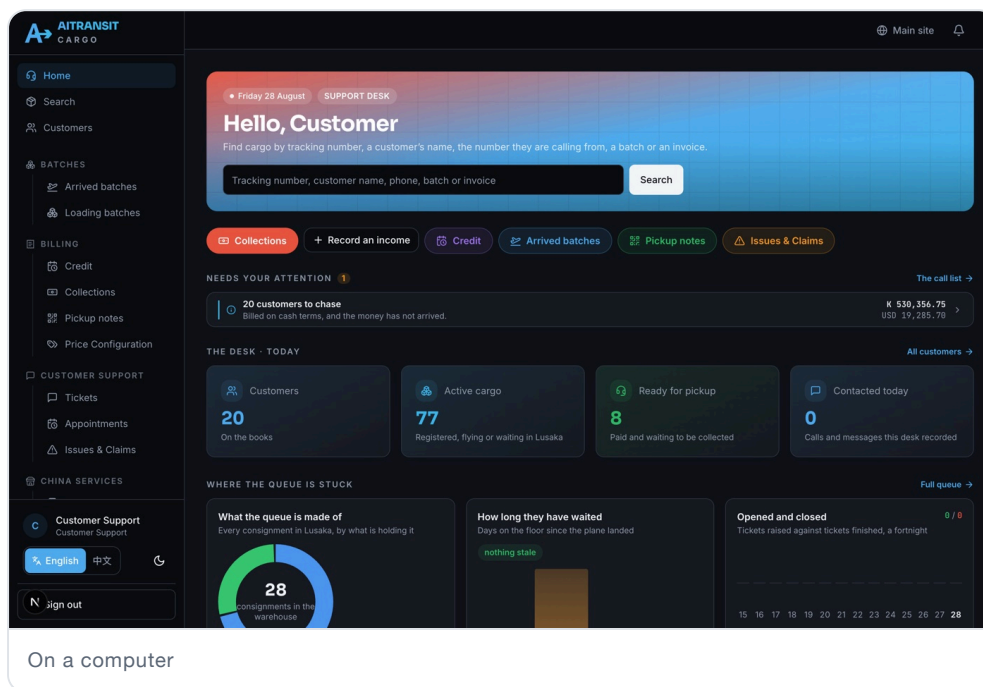

Every screen in this system is available in English and 中文. The switch is at the bottom of the sidebar, beside your name.

IF SOMETHING IS WRONG

Do not work around it. A wrong record is harder to fix than a missing one — tell your supervisor, or raise it under Issues & Claims, and let the system record what happened.

Your home screen

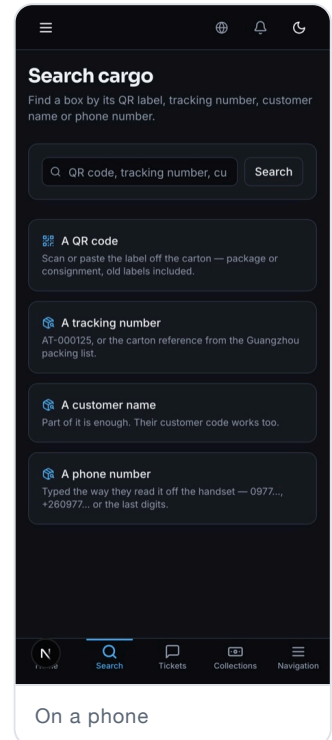

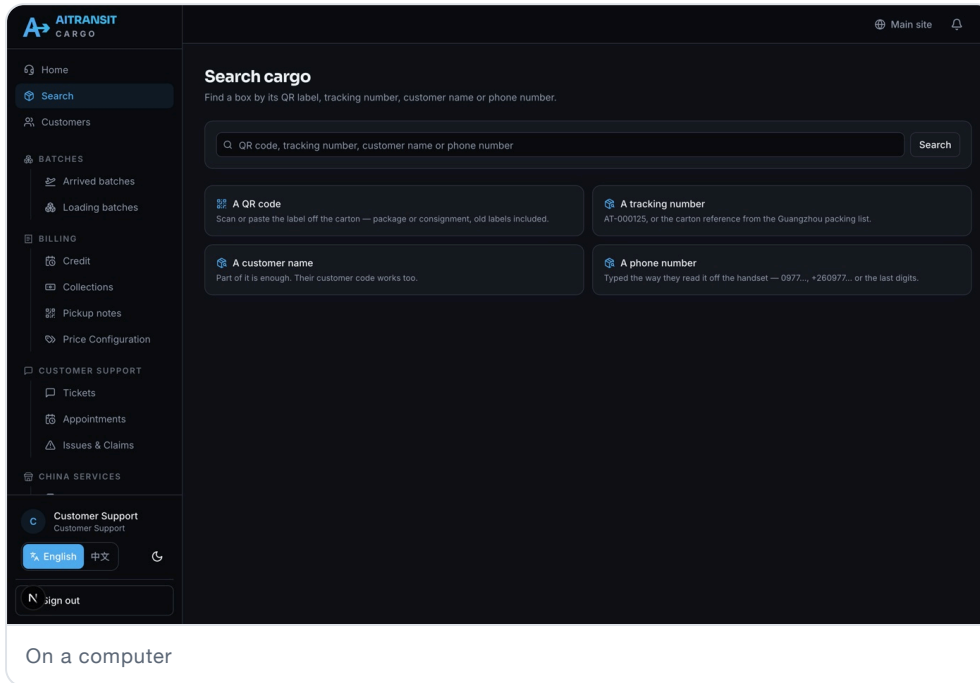

What customers are waiting on, and what has gone wrong that somebody needs to explain.

- 1 Start on “Needs your attention”. It is your queue for the day, worst first.
- 2 Use the search box at the top for a tracking number, a phone number or a customer name.
- 3 Every call starts from one of two things: the cargo, or the person.
Find the cargo when they have a tracking number. Find the customer when they do not.

Answering "where is my cargo?"

The question you will be asked more than any other. One search box answers it.

- 1 Ask for the tracking number. If they do not have it, search their name or phone number.
- 2 Read them the status and the location, and tell them what happens next.
- 3 If the box has not been checked in at Lusaka yet, say so plainly, and give the batch it is on.
- 4 Never guess a date. Read the customer what the system says.

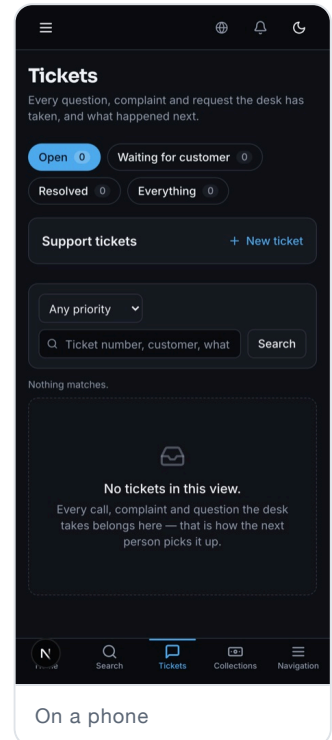

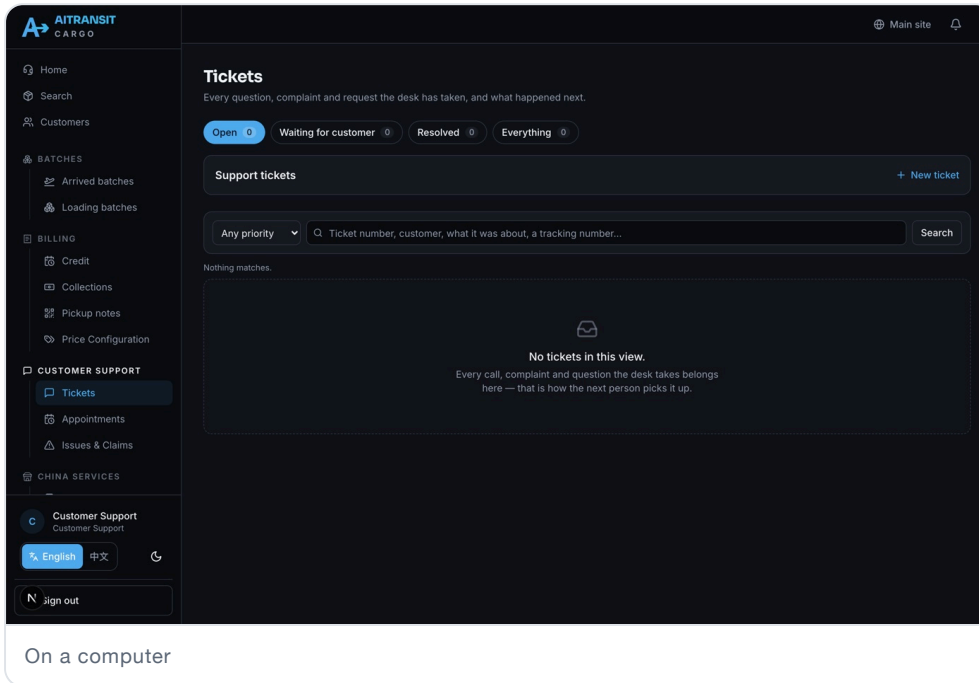

A date you invented is a date the customer will hold you to.

GOOD TO KNOW

The customer can see the same information themselves on the tracking page, without signing in. Telling them so saves the next telephone call.

Tickets

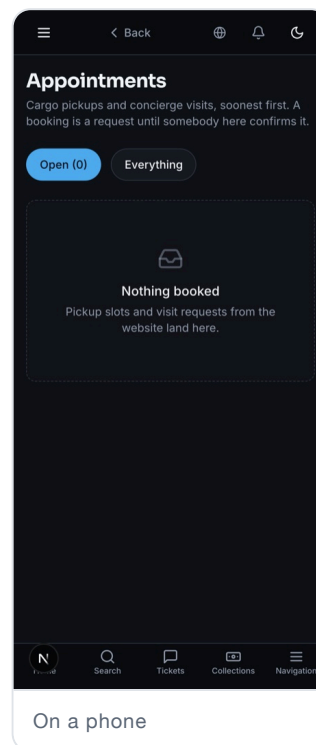

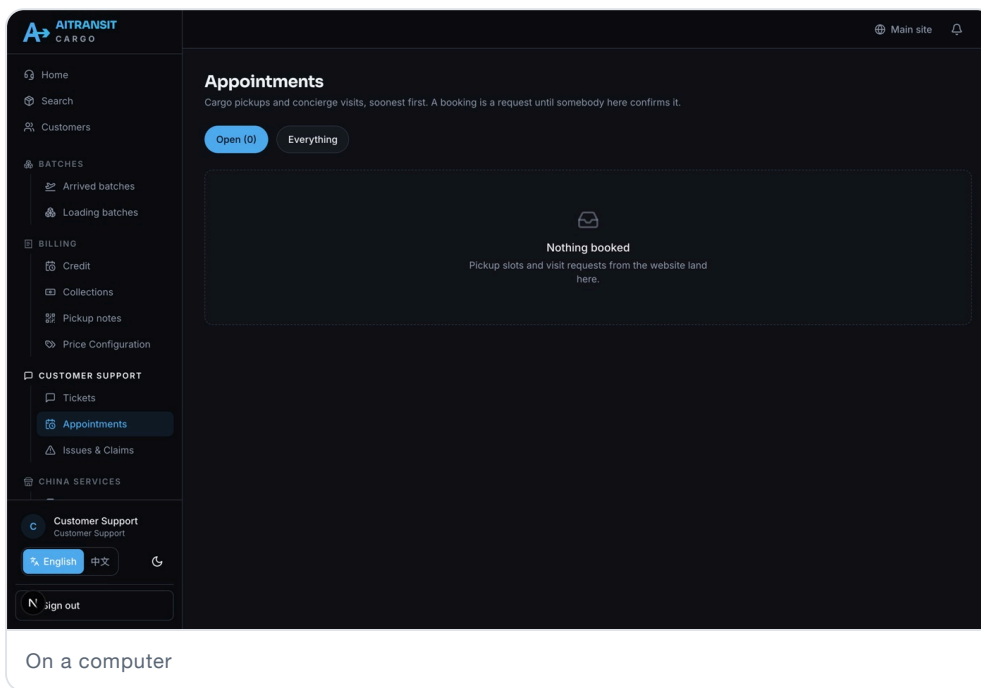

A question or a complaint that is not finished yet. Keep it open until it actually is.

- 1 **Write what you told the customer, not just what they asked.**
The next person to speak to them needs to know what they were already promised.
- 2 **Set the category and the priority when you open the ticket.**
High and urgent tickets rise to the top of somebody's day. Marking everything urgent means nothing is.
- 3 **Put your name on it, so the customer speaks to the same person twice.**
- 4 **Close it when the customer's problem is finished, not when your part of it is.**

Appointments

Cargo pickups in Makeni, and market or factory visits in Guangzhou.

- 1 For a pickup, check the cargo is actually ready before you confirm a day.
- 2 For a market visit, check the market is open and put somebody with them.
- 3 Record where they want to be met, and the phone number to ring on the day.
- 4 Write our note on the booking after the visit.

The next person to speak to that customer needs to know how it went.

Issues & claims

Cargo that is missing, short, damaged or under investigation.

Issues & Claims
Every item flagged missing, damaged or wrong on arrival — held here, with the boxes it belongs to, until someone closes it out.

Open cases 1
Everything nobody has finished with

Missing cargo 0
Short or nothing came off the plane

Damaged cargo 1
Arrived, but not in one piece

Cargo found 0
Turned up and back in the warehouse

Compensation pending 0
Approved payouts
Finance has not paid

Closed cases 0
Signed off, kept on the record

Packages unaccounted for 0 | Oldest open 1d | Nobody carrying 1

Everything 1 | Missing 0 | Damaged 1 | Wrong item, batch or weight 0 | On hold 0 | Other 0

Under investigation (1)

PROBLEM	CASE	TRACKING	CUSTOMER	GOODS	BOXES HERE	CARGO STATUS
Damaged cargo	Under investigation	AT-000006	Kabwe Hardware ...	Water pump spare parts	2 of 2	Checked in at Zambia warehouse

On a computer

- 1 **Open a case against the cargo and choose the kind: damage, packaging, arrival or missing cargo.**
- 2 **Put your name on it.**
A case with nobody carrying it is a case nobody is working.
- 3 **Write down what you told the customer, every time you tell them something.**
- 4 **Close the case only when the cargo is found, or Finance has recorded the payout.**

BE CAREFUL

While a case is open the customer cannot collect and their balance is frozen. That is correct — but it means an open case somebody forgot about is a customer who cannot get their goods. Close what is finished.

Customers

Everyone on the books, with their cargo, their invoices and what they owe.

On a computer

- 1 Search by name, customer ID, phone number or city.
- 2 Open a customer to see every consignment, every invoice, and what they owe.
- 3 Correct a phone number here, on the customer, not on the cargo.

The customer record is what every reminder and every WhatsApp message is sent to.

China markets

The sourcing directory customers ask about — which market sells what, in which city.

AITRANSIT CARGO

China markets
Where to send a customer for what they are buying — and how it will fly home.

① The route matters as much as the market. Goods bought around Guangzhou consolidate at our Guangzhou warehouse; electronics from Shenzhen fly out of Hong Kong. Telling a customer the wrong one changes what they pay.

Yiwu International Trade City
义乌国际商贸城
Small goods in volume — the widest single range in China

The largest small-commodity wholesale market in the world, laid out as five numbered districts across several buildings. Traders come here when they want many different products in one trip rather than one product in depth.

📍 Yiwu, Zhejiang — Futian
🕒 Roughly 09:00–17:00 daily; districts close in rotation on holidays

WHAT THEY SELL
Toys and games Jewellery and accessories Stationery
Kitchenware and household goods Hair accessories and wigs
Festival and party goods Luggage and bags

TELL THE CUSTOMER

- Allow at least two full days. One district alone takes a morning to walk.
- Minimum order quantities are low here compared with factory buying, which is why it suits first-time importers.
- Goods bought here normally consolidate through Guangzhou for the flight to Lusaka.

Guangzhou Wholesale Markets
广州批发市场
Clothing, shoes, bags and general merchandise

Not one market but a cluster across the city, each with its own speciality: Baiyun for leather and bags, Shahe and Thirteen Hang for clothing, Zhanxi for wholesale fashion. This is where most Zambian traders buy.

📍 Guangzhou, Guangdong — Baiyun, Liwan and Yuexiu
🕒 Most markets 09:00–18:00; leather and clothing markets start earlier

WHAT THEY SELL
Clothing, new and boutique Shoes and footwear
Handbags and leather goods Watches and fashion accessories
General merchandise

TELL THE CUSTOMER

- Our Guangzhou warehouse is in this city, so goods bought here reach us the same day.
- Clothing markets trade early — several are winding down by mid-afternoon.
- Ask for the wholesale price, not the display price. The first number is rarely the last.

On a computer

- 1 Use the directory when a customer asks where to buy something in China.
- 2 Each entry shows what the market sells and when it opens.
- 3 Send the customer the market's address and our warehouse address together.

The supplier needs the warehouse address to deliver to, and it is the commonest thing a first-time customer forgets to ask for.
