GUIDE BOOK

Finance

Pricing, invoices, payments, credit and the money desk

THIS DESK IS RESPONSIBLE FOR

- Every consignment is priced from the published rate book, not by hand
- Every payment names the account the money landed in
- Credit is a decision with a name against it, never a favour

finance@aitransit.co.zm · Department

Contents

01 Finance overview

What is owed, what has been collected, and what is still to be priced.

02 The rate book

Every price the system quotes comes from here. Change it here and every future quote changes with it.

03 Credit

A customer asking to collect now and pay later. Approving it releases the cargo with the bill unpaid.

04 Company accounts

Five accounts: office cash in USD and ZMW, bank in USD and ZMW, and mobile money. One account holds exactly one currency.

05 Collections

Who owes what, and for how long. The chase list.

06 Pickup notes

The document that lets cargo leave the counter. Issued when a bill is paid, or when credit has been approved.

07 Money desk

Currency bookings customers have made on the website. A booking is a request, never a completed transfer.

08 Exchange board

What the public exchange page shows. Publish the rates every morning.

09 Supplier payments

Customers asking us to pay their factory in RMB. Check the details before anything is sent.

10 General ledger

Every movement of money, in one register, in the order it happened.

Before you start

Signing in

Everyone at AITRANSIT signs in at the same address with their own email and password. The system knows your department and opens your own screens — you never choose a role.

Your login **finance@aitransit.co.zm**

ON EVERY SCREEN

The sidebar on the left is your department's menu — it only ever shows what your desk is allowed to open. The search box at the top accepts a tracking number, a customer, a phone number or a QR scan. Your name is at the bottom of the sidebar, with the language switch and the light/dark switch beside it.

GOOD TO KNOW

Every screen in this system is available in English and 中文. The switch is at the bottom of the sidebar, beside your name.

IF SOMETHING IS WRONG

Do not work around it. A wrong record is harder to fix than a missing one — tell your supervisor, or raise it under Issues & Claims, and let the system record what happened.

Finance overview

What is owed, what has been collected, and what is still to be priced.

- 1 Read the top row first: cash available, expected to come in, out this month.**
The kwacha figure is the big one. The dollar line under it is the same money, converted at the invoice rate.
- 2 Check the batch strip: still open, with the desk, confirmed.**
A batch that is not confirmed has not been fully priced, so its profit figure is not final.
- 3 Work the “Needs you” list — unpaid bills, and cargo cleared but not collected.**
- 4 Record money from the four buttons as it happens: an income, a cost, a movement between accounts, a cash count.**

The rate book

Every price the system quotes comes from here. Change it here and every future quote changes with it.

Published prices

Every quote in the system comes from this table. Nothing is hardcoded.

All categories Show withdrawn

APPLIES TO	TIER	PRICE	FLOOR	SINCE	ACT
AirPods Special goods Per item, any weight.	Any weight	<u>USD 10.00 per item</u>	min 1 kg	28 Aug 2026	× Withdraw
Documents Special goods Per item, any weight.	Any weight	<u>USD 40.00 per item</u>	min 1 kg	28 Aug 2026	× Withdraw
Camera Special goods Per item, any weight.	Any weight	<u>USD 45.00 per item</u>	min 1 kg	28 Aug 2026	× Withdraw
Smart Watch Special goods Per item, any weight.	Any weight	<u>USD 10.00 per item</u>	min 1 kg	28 Aug 2026	× Withdraw

Exchange rate

Applied to every invoice raised from now on. Invoices already issued keep the rate they were raised at.

New rate — kwacha to one US dollar

27.5

Why (optional)

e.g. BOT mid-rate, 30 July

Publish rate

PREVIOUS RATES

27 — 11 hours ago

Publish a price

Takes effect on the next quote. Invoices already raised keep theirs.

+ New price

On a computer

- 1 Set a rate per category, per weight band.
- 2 Use a product rule when one item needs its own price.
A product rule beats the category rate for that item and leaves everything else alone.
- 3 Check when the price was last changed, and by whom, before you change it again.
- 4 Withdraw a price you no longer offer rather than deleting it.
A withdrawn price stays visible under “Show withdrawn”, so an old invoice can still be explained.

BE CAREFUL

Changing a rate never changes an invoice that already exists. A confirmed invoice keeps the rate it was raised at, forever. That is deliberate: a customer who was quoted a figure must still see that figure in six months.

Credit

A customer asking to collect now and pay later. Approving it releases the cargo with the bill unpaid.

- 1 Check what the customer already owes before you approve anything.
- 2 Set a term. Credit without a due date is not credit.
- 3 Approve or reject with a reason. Both are recorded against your name.

Company accounts

Five accounts: office cash in USD and ZMW, bank in USD and ZMW, and mobile money.
One account holds exactly one currency.

Accounts
Where the company's money sits, and everything that has moved through it. Each figure is derived from the ledger — nothing here is typed.

Overview Accounts Collections General ledger Expenses Payroll Money desk Supplier payments Profit & loss Aud

Move money between accounts Count the cash tin

⚠ These are movements recorded here, not balances. No account has an opening balance yet, so whatever was already in the account is not counted.
Set the opening balances →

ACROSS EVERY ACCOUNT
K 354,944
USD 12,907.05 on the invoice rate - six accounts, one currency each

K 0

On a computer

- Set each account's opening balance once, on the day you start using the system.**
Until you do, the balance shown is only what this system has recorded — not what is actually in the account.
- Make every payment name the account the money landed in.**
- Count the cash tin at the end of each day and record the count here.**

BE CAREFUL

Always record which account the money actually landed in. A balance in this system is a running total of movements, not a number somebody typed — an unattributed payment is money the books cannot see.

Collections

Who owes what, and for how long. The chase list.

On a computer

On a phone

- 1 Work the Overdue column first, then Due today, then Due this week.
- 2 Open a row to see the invoice, and what the customer owes in cash and on credit.
- 3 Ring or message from the row itself.
The WhatsApp message goes out with the tracking number and the amount already in it, so the customer does not have to ask what it is for.
- 4 Record the payment on the same row the moment the money lands, and name the account.

Pickup notes

The document that lets cargo leave the counter. Issued when a bill is paid, or when credit has been approved.

- 1 Issue the note only once the money is recorded or the credit is approved.
- 2 Find a note by its number, the customer, their phone number or the tracking number.
- 3 Print it, or send it on WhatsApp. The customer needs it at the counter.
- 4 Cancel a note issued in error. Never issue a second note for the same cargo.

Two live notes for one consignment is how a box gets handed over twice.

Money desk

Currency bookings customers have made on the website. A booking is a request, never a completed transfer.

- 1 **Confirm the rate with the customer before anything moves.**
- 2 **Record the rate you agreed. The booking then waits for their funds.**
- 3 **When the money arrives, name the account it landed in, and confirm.**
Confirming fixes the rate. That is the moment the booking becomes a transaction.
- 4 **Cancel a booking the customer never funded. Do not leave it open.**

Exchange board

What the public exchange page shows. Publish the rates every morning.

Exchange board

The buy and sell rates shown on the public website. Indicative — every booking is confirmed with the customer before money moves.

This board is separate from the USD→ZMW rate invoices are converted at, which lives on the Pricing screen. Changing a rate here changes the website and nothing else — no invoice, past or future, reads these figures.

Published pairs

USD → ZMW buy 26.50 · sell 27.50 Live

27 Aug 2026, 23:50

Base	Quote	We buy at	We sell at
USD	ZMW	26.5	27.5

Note on the card: Indicative — confirm with the finance desk.

Add a pair

Base: USD, Quote: ZMW, We buy at: , We sell at:

Note on the card: e.g. cash only, minimum USD 500

Order: 0

Publish pair

On a computer

- 1 The published pairs are what customers see on the website. They are for display.
- 2 The invoice exchange rate is a different number, and it is set on the Money desk.
That is the rate every invoice is converted at. Changing the board does not change a single invoice.
- 3 Hide a pair rather than deleting it when you stop quoting it.

BE CAREFUL

A rate the system seeded is marked Indicative and nobody has stood behind it. Confirm it before you trade at it — the customer-facing page says so beside every pair.

Supplier payments

Customers asking us to pay their factory in RMB. Check the details before anything is sent.

- 1 Record what was paid to the supplier in China, in the currency it was actually paid in.
- 2 Attach the proof — the transfer screenshot or the receipt.
- 3 A payment stays pending until somebody confirms the money went out.

BE CAREFUL

Copy the supplier's bank details exactly as the customer sent them. We check before paying, but we cannot correct a digit nobody can see is wrong.

General ledger

Every movement of money, in one register, in the order it happened.

On a computer

- 1 Filter by account, by type or by date to find a movement.
- 2 Every line names the account the money moved through and the person who recorded it.
- 3 To correct a mistake, cancel the movement and record it again.

The original stays visible. The ledger is a record of what happened, including what was corrected.
