Zambia Warehouse

Lusaka floor — check-in, storage and release

THIS DESK IS RESPONSIBLE FOR

- Every consignment that lands is checked in and weighed on our own scale
- The confirmed Lusaka weight is what the customer is billed on
- Nothing leaves the counter without a scan against a valid pickup note

warehouse@aitransit.co.zm · Department

Contents

01 Your home screen

What has landed, what is still to be checked in, and what is waiting to be collected.

02 Checking cargo in

The moment cargo becomes real in Lusaka. Weigh it, confirm it, and the system prices it automatically as a draft for Finance to review.

03 Arrived batches

Every dispatch that has left China. Open one to see its cargo, its documents and its full timeline.

04 Releasing cargo

The one control that stops cargo going to the wrong person. Scan the QR label on the box against the customer's pickup note.

05 What is on the floor

Everything physically in the Lusaka warehouse right now, and how long each consignment has been sitting there.

Before you start

Signing in

Everyone at AITRANSIT signs in at the same address with their own email and password. The system knows your department and opens your own screens — you never choose a role.

Your login **warehouse@aitransit.co.zm**

ON EVERY SCREEN

The sidebar on the left is your department's menu — it only ever shows what your desk is allowed to open. The search box at the top accepts a tracking number, a customer, a phone number or a QR scan. Your name is at the bottom of the sidebar, with the language switch and the light/dark switch beside it.

GOOD TO KNOW

Every screen in this system is available in English and 中文. The switch is at the bottom of the sidebar, beside your name.

IF SOMETHING IS WRONG

Do not work around it. A wrong record is harder to fix than a missing one — tell your supervisor, or raise it under Issues & Claims, and let the system record what happened.

Your home screen

What has landed, what is still to be checked in, and what is waiting to be collected.

- 1 **Start with anything arrived but not yet checked in. Until you check it in, it cannot be priced or collected.**
- 2 **Then work what is cleared but not collected.**
That cargo is already paid for and still taking up your floor. It is the cheapest space you will ever recover.
- 3 **Use the search box, or the scanner, for any box a customer is asking about.**

Checking cargo in

The moment cargo becomes real in Lusaka. Weigh it, confirm it, and the system prices it automatically as a draft for Finance to review.

1 Weigh every consignment on our own scale.

The China weight is what the sender declared. The Lusaka weight is what the customer pays on.

2 Enter the confirmed weight and check the consignment in.

3 Report anything short, damaged or missing straight away under Issues & Claims.

BE CAREFUL

Check-in starts the storage clock. Seven days are free; after that the customer is charged USD 2 a day. Checking cargo in late does not delay the charge — it just means the count started without anybody watching.

Arrived batches

Cargo still waiting in China is on the [two loading tables](#).

On a computer

- 1 Use the tabs to separate what is in transit from what is already on your floor.
- 2 Open a batch to see every consignment on it, with its China weight and its packing list.
- 3 Check the batch documents before you start unloading, so you know what you are counting against.
- 4 Cargo still in China is not here. It is on a loading table, and it appears once the flight is dispatched.

Releasing cargo

The one control that stops cargo going to the wrong person. Scan the QR label on the box against the customer's pickup note.

1 Ask for the pickup note. It is on the customer's phone or printed.

2 Scan the QR label on each carton.

3 Record who collected it, and their relationship to the customer.

The system asks whether they are the customer, family, an employee or an agent. Write down which, because that is the answer to the argument six weeks later.

4 Take the delivery photograph before the cargo leaves the counter.

It is the only proof of what was handed over, and of the condition it was in.

5 If the customer is only taking some of the boxes, release only those.

The screen counts them for you — “Boxes here: 2 of 3”. The rest stay on the floor and stay your responsibility.

BE CAREFUL

Never release against a name, a phone call or a screenshot of a message. The scan is the check. If the note will not scan, the cargo does not leave — send them to the office.

What is on the floor

Everything physically in the Lusaka warehouse right now, and how long each consignment has been sitting there.

Available cargo
Every piece of cargo standing in the Lusaka warehouse right now — checked in, not yet handed over.

- Cargo held**: 32 (138 packages on the floor)
- Not yet paid for**: 20 (Stored, waiting on Finance)
- Cleared for pickup**: 12 (38% Pickup note issued — collectable)
- Held over 7 days**: 4 (Longest sitting 11 days)
- Weight on the floor**: 2,179.45 kg (Across 32 consignments)

Filters: All held cargo (32) | Not yet paid for (20) | Cleared for pickup (12)

On a computer

- 1 Watch anything approaching seven days. Tell Customer Support before the storage charge starts, not after.
- 2 Sort by longest sitting to find the cargo that has been here the longest.
- 3 “Stored, waiting on Finance” means the customer has not paid. “Cleared for pickup” means they can take it today.
- 4 Tell Customer Support who to ring.

You are the only person who can see the floor. Nobody else knows a box has been sitting there for nine days.
